(fig1)

Jina, a standout element of our collection, tells numerous stories from our designers! With its elephant-like appearance and natural rattan, Jina narrates the road trip of our team in India. During this journey, nature awakened precious ideas in our

designers, which they entrusted to our French artisans upon their return. And so, Jina came to life!

Hadis

(fig1)

Our Hadis coffee table, resembling a guitar pick in shape, pays homage to our Guitar Heroes, from David Gilmour to Jimi Hendrix, Brian May, and Jimmy Page, capturing the rock and its vibrancy in the 70s. Crafted from sustainable

and responsible Iroko wood, our coffee table sparks discussions, anecdotes, and good times. We've designed a table from which the most beautiful stories emerge.

Shirin

(fig1)

(fig1)

In the 15th arrondissement of Paris, in the Front de Seine district, you come across this immense tower with curved windows. Painted in scarlet red, it's the Hotel Nikko, a major figure of 1970s architecture that inspired our designers to create a table with rounded edges (also reminiscent of cathode-ray televisions). Made from solid Iroko wood, this table is suitable for both outdoor and indoor environments.

Sarina

(fig1)

Sarina elegantly tells the tale of the Teahupo'o wave in Tahiti, a vision first dreamed of by our designers, then witnessed, and finally translated into an indescribable form. But nothing is indescribable for gleemzy, who, upon returning from their journey to the pearl of the Pacific, sketched this unique wave with delicate and delightful curves. Our floor lamp gracefully expresses a nature in perfect balance, achieved through the exquisite craftsmanship of our artisans.
